Software Engineer turned Product Manager with 6+ years in fintech, owning platform roadmaps and driving cross-functional execution across engineering, commercial, and operational teams. Uniquely positioned to bridge the technical and commercial — translating complex infrastructure challenges into scalable, merchant-facing outcomes. Proven track record of prioritizing high-impact bets, aligning global stakeholders, and delivering measurable results in fast-moving, enterprise-scale environments.

EMPLOYMENT HISTORY

Senior Product Manager, Murex | Jul 2020 — Present | Beirut, Lebanon

- Spearheaded the transformation of MXtest from a JavaFX desktop tool into a web-based test automation platform supporting UI (Swing & Web), Java, and REST API testing — integrating it into the MXevolve ecosystem and directly enabling Murex to launch **Upgrade as a Service (UaaS)** — a new managed service offering for tier-1 banks
- **UaaS** reduced client upgrade cycles from 3–5 years to under 1 year, fundamentally changing Murex's commercial model and unlocking a scalable, recurring managed service for tier-1 banking clients across EMEA.
- Partnered with engineering, UI/UX, and cross-department stakeholders to define a company-level test automation roadmap, aligning priorities with company strategy and enabling automated testing in Murex Continuous Integration managed service.
- Defined and executed the go-to-market strategy for MXtest adoption, driving onboarding across enterprise clients operating in heavily regulated financial environments.
- Delivered measurable outcomes: 40% increase in automated test coverage across 2,000+ critical test cases and 30% faster feature onboarding, directly improving SLA compliance for global banking clients.

Software Engineer, BMW | Feb 2019 — Aug 2019 | Munich, Germany

- Partnered with stakeholders from three BMW plants to understand operational pain points and requirements, reducing UI change requests by 30%.
- Led the user interface redesign across four deployed robots, improving responsiveness and engagement by 63%, resulting in faster task execution and a 25% increase in operator throughput.
- Launched the Logistics Robotics Web Application for real-time monitoring and control, standardizing operations and boosting cross-plant productivity.
- Built a performance analysis framework, reducing troubleshooting time by 40% and enabling scalable maintenance.
- Delivered solution demonstrations and technical walkthroughs to cross-functional plant teams across three international sites, translating complex system capabilities into clear operational value for non-technical stakeholders.

EDUCATION

Lebanese American University | Sep 2015 — Jun 2020 | Beirut, Lebanon

BE in Computer Engineering

- Awards: Dean's Distinction List

SKILLS

- **Technical Expertise:** Cloud & SaaS platforms - API design & platform integrations - Application lifecycle management - Software development lifecycle (SDLC) - Software testing & automation - Salesforce CRM (Trailhead)
- **Product Management & Strategy:** Platform & scalable product management - Road mapping & prioritization - KPI tracking - Agile execution - Digital transformation strategy - Stakeholder collaboration & cross-functional alignment - User research - UX integration - Market research - A/B testing
- **Programming Languages & Technical Tools:** Python – Java – SQL – Git – Jira – Confluence - Power BI - Microsoft Office - Business process & workflow tools (Pega, PeopleSoft)
- **Soft Skills:** Cross-functional collaboration - Strategic problem solving - Product storytelling & executive communication - Mentoring & coaching - Business acumen - Stakeholder influence
- **Languages:** Arabic (Native) – English (Fluent) – French (Basic)

CERTIFICATES

- Elements of AI for Business (University of Helsinki)
- Data Analyst Associate (Microsoft)
- SAFe Agilist (SAFe by Scaled Agile, Inc)
- Certified Tester (ISTQB)
